

Wilson Balderrama

Senior Frontend Engineer

[LinkedIn](#) · [Github](#) · [Website](#) · [Email](#)

Senior Frontend Engineer with 10+ years of experience building scalable, user-focused web applications using React, Next.js, TypeScript, and JavaScript.

Experienced in large-scale enterprise products, frontend architecture, testing, performance, and cross-functional collaboration, with growing hands-on experience in AI-assisted development workflows and OpenAI/LLM API integrations.

EXPERIENCE

Senior Full-stack Engineer at Independent Software Development

March 2024 - Present (2 yrs 6 mos) | Remote

Designed, built, and operated a full-stack platform to automate transaction tracking, reconciliation, and trading workflows across multiple financial services and digital asset platforms.

Key Contributions:

- **Frontend Development:** Built web applications using React and Next.js to track transactions, manage operational workflows, and support internal tools across different platforms.
- **Backend Development:** Developed backend services using Express.js and relational databases, including Cloud Functions, to automate order tracking and reconciliation between Binance, Airtm, and banking transactions.
- **Binance API Automation:** Created a bot that interacts with Binance APIs to automatically post and update P2P trading ads for USDT, USDC, and BTC.
- **Process Optimization:** Integrated real-time order synchronization to improve efficiency and reduce manual workload in digital asset trading.

Technologies:

React · Next.js · TypeScript · Node.js · Express.js · PostgreSQL · MySQL · Redis · Jest · OpenAI API Integration.

Frontend Software Engineer at PayPal

Apr 2021 - Mar 2024 (3 yrs) | Remote

Worked on PayPal's checkout experience, building and maintaining frontend functionality used by millions of customers worldwide.

Key Contributions

- Developed and delivered new checkout features driven by A/B experiments and product requirements.
- Contributed to the implementation of PayPal Checkout Design V2 in 2023, helping transition the existing checkout experience to new visual and interaction standards.
- Refactored and improved existing frontend code to support the new checkout experience while maintaining consistency, performance, and maintainability.
- Built and maintained automated tests using Jest, React Testing Library, and WebdriverIO to help ensure reliable releases and prevent regressions.
- Collaborated closely with product stakeholders and design teams to review requirements, present completed features, gather feedback, and align implementation with product and UX expectations.
- Contributed to code quality through clean code practices, integration testing, code reviews, and continuous improvement of the frontend codebase.

Technologies

React · TypeScript · Node.js · Jest · React Testing Library · WebdriverIO

React Native Developer at tivelabs

Jan 2020 - Dec 2020 (1 yr) | Remote

Developed and maintained features for a cross-platform mobile application using React Native, with native integrations in iOS and Android.

Key Contributions

- Built reusable, testable, and maintainable mobile features using JavaScript, Swift, Objective-C, and Java.
- Integrated Firebase services for data storage and application functionality.
- Identified, debugged, and resolved defects across both React Native and native mobile layers.
- Worked with native iOS and Android code when platform-specific functionality was required.
- Contributed to improving code quality, reliability, and maintainability across the application.

Key Accomplishment

Built functionality for an application that tracked drivers' routes and detected nearby stores, enabling the app to surface relevant products, discounts, and coupons based on their location.

Technologies

React Native · JavaScript · iOS · Swift · Objective-C · Android · Java · Firebase

SKILLS

- | | |
|---------------------------|--------------------------|
| • TypeScript | • JavaScript |
| • React.js | • Next.js |
| • Node.js | • React Testing Library |
| • Jest | • Frontend Architecture |
| • REST APIs | • GraphQL |
| • AI-Assisted Development | • OpenAI API Integration |

LANGUAGES

- | | |
|--|---|
| • English - Professional working proficiency | • Spanish - Native or bilingual proficiency |
|--|---|

EDUCATION

Bachelor of Science in Systems Engineering

University of Aquino Bolivia | 2004 - 2011

PROJECTS

CV Builder

Built a web application for creating and exporting professional CVs, focused on responsive editing, reusable components, document preview, and PDF generation. Tech: Next.js · React · TypeScript · Paged.js / PDF rendering
